

Krishna Alaspure

Senior System Engineer

Dedicated and proficient Full Stack Web Developer with three years of hands-on experience specializing in frontend development utilising HTML, CSS, JavaScript, React, Tailwind CSS, and TypeScript. Possessing an average proficiency in Node.js, Express.js, and RESTful APIs, I am keen on leveraging my skills to contribute effectively to the growth of both individuals and the company. Seeking a role where I can utilise my expertise to drive innovation, enhance user experiences, and foster the growth of both personal and organizational objectives.

WORK EXPERIENCE

Senior System Engineer Infosys Pvt. Ltd.

07/2021 - Present

Pune

The Capitals Group Companies

Tasks

- Designed and implemented RESTful APIs to facilitate seamless interaction between front-end and back-end services, ensuring robust data handling and user authentication via JWT.
- Assisted in the development of a social media platform using the MERN stack, contributing to the implementation of key features such as user profiles, messaging, and notifications.
- Conducted performance audits and refactored code, resulting in a improvement in application load times and overall responsiveness.
- Utilised Redux for global state management, improving application maintainability and facilitating effective data flow between components.
- Worked closely with designers and stakeholders to define application features and enhance user experience, leading to increase in customer satisfaction ratings.
- Conducted regular code reviews and provided guidance to junior developers, promoting best coding practices and enhancing team productivity.
- Maintained clear and comprehensive documentation for code bases and APIs, facilitating knowledge transfer and on-boarding of new team members.

PERSONAL PROJECTS

DemoLanding Page

- Created a demo landing page for startups company using ReactJS, Tailwind CSS, etc.

YouTube Clone

- Created YouTube clone using ReactJS, Tailwind CSS and Google Youtube Public API's.

E-Mart

- The application follows a MERN stack architecture, utilizing RESTful APIs to facilitate communication between the front-end and back-end. The front-end is built with React, allowing for a dynamic and responsive user interface, and back-end is developed with ExpressJS library.
